ACCOUNTANCY (055)

Reconstructed Question Paper — 2025

The uploaded document is an answer/working booklet. The following questions are reconstructed from identifiable working headings, figures and journal entries; where the original transaction wording cannot be recovered, it is not fabricated.

Part A — Accounting for Partnership Firms and Companies

Q.21 From the given partnership information, prepare the **Revaluation Account** and the partners' capital accounts. The working in the booklet involves adjustments for assets/liabilities and changes in partners' capitals.

Q.22 Prepare the **Revaluation Account** from the following adjustments indicated in the working:

- adjustment of assets/liabilities,
- recording of revaluation profit/loss,
- adjustment of partners' capital accounts.

Q.23 A company issues shares and receives applications and allotment money. Prepare the necessary journal entries for:

(a) receipt of share application money,

(b) transfer of application money,

(c) receipt of allotment money,

(d) money received on calls,

(e) forfeiture of shares where the shareholder fails to pay the required amount,

(f) reissue of forfeited shares.

Q.24 Prepare the journal entries relating to the issue of debentures, including:

(a) receipt of debenture application/allotment money,

(b) issue of debentures,

(c) payment/recognition of interest,

(d) interest due and interest paid,

(e) transfer to the Statement of Profit and Loss where applicable.

Q.25 Prepare the partners' capital accounts and the balance sheet after admission/retirement/reconstitutio of a partner, using the capital balances and adjustments shown in the question.

Q.26 Prepare the necessary journal entries for the redemption/repayment of debentures and related interest transactions.

Working Notes / Numerical Information Recoverable from the Booklet

The answer booklet visibly contains partnership capital figures, revaluation entries, share application/allotment calculations and debenture-interest calculations. The exact original names, dates and full transaction wording are not consistently legible, so this reconstruction keeps the accounting task but avoids inventing unavailable particulars.
