

PSYCHOLOGY (037)

Reconstructed Question Paper — 2025

Reconstructed from the submitted answer booklet. The exact MCQ choices and some case-study wording are not visible.

Section A — Objective Questions

Q.1–Q.14 Answer the following multiple-choice/assertion–reason questions. Identifiable topics include:

1. observational/associative learning,
2. social desirability,
3. psychological disorders,
4. scientific testing and psychological concepts,
5. biological/behavioural/cognitive approaches,
6. resilience and coping,
7. social influence,
8. stereotypes and gender/social norms.

Section B — Short Answer Questions

Q.15 Explain the characteristics of intellectually gifted individuals. Discuss exceptional general abilities, rapid information processing, advanced logical reasoning/problem solving, superior generalisation/discrimination and creativity.

Q.16 Explain how family and school environments influence the formation of attitudes in children.

Q.17 What is social loafing? Explain why individuals may reduce their effort when working in a group and suggest strategies to reduce social loafing.

Q.18 What is assertiveness? Explain assertive communication and distinguish it from aggressive and passive behaviour.

Q.19 Explain how group norms and common routines influence individual behaviour and group formation.

Section C — Psychology and Health

Q.20 According to the personality research discussed in the prescribed text, explain the relationship between hardiness and stress/health. Describe the major components of hardiness:

- (i) commitment,
- (ii) control,
- (iii) challenge.

Q.21 Explain how the Renaissance and Enlightenment changed the perception and treatment of psychological disorders. Discuss the movement from supernatural explanations toward medical, humanitarian and community-based approaches.

Q.22 Discuss the relationship between intelligence and creativity. Explain why high intelligence does not automatically guarantee high creativity and why a minimum level of intelligence may be required for effective creative performance.

Q.23 Explain alternative therapies used for psychological disorders. Discuss yoga, meditation and related practices, including evidence for their possible usefulness.

Section D — Intelligence, Culture and Attitudes

Q.24 Explain the concept of technological intelligence and discuss how culture influences the conception and measurement of intelligence. Include the role of cultural context and the ability to adapt to one's environment.

Q.25 Explain the major processes of attitude formation:

- (i) learning through association,
- (i) learning through direct instruction/reinforcement,
- (i) learning through modelling/observing others,
- (i) learning through group or cultural norms.

Q.26 Explain the concept of a functional/therapeutic technique involving gradual exposure to an anxiety-provoking stimulus, as described in the prescribed psychology material.

The exact final-page questions and original MCQ wording are not sufficiently recoverable from the answer booklet.
